To run github app:

Use git bash and run the following command:

- git clone https://github.com/JessiP23/deploy-math-app.git
- cd deploy-math-app
- code .

In VSCode:

- python manage.py makemigrations
- python manage.py runserver

Enjoy this app. This app was designed for college students, for my students, and for my community. This app will add more features and add AI models that will support the student's questions/posts.
